

Corner Canyon Science Department Course Offering

Core Science

Biology
Physics
Chemistry
Physics with Technology (or CTE credit)

Advanced Placement

Biology
Chemistry
Physics

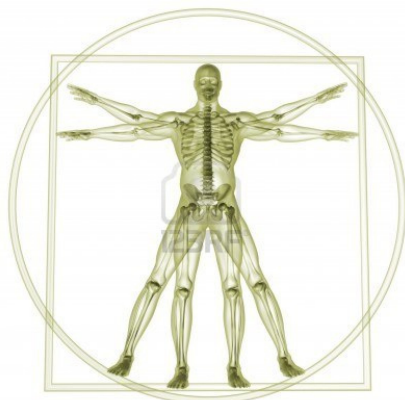

Honors

Chemistry
Physics
Human Anatomy/Physiology

AP Biology and Chemistry require lab attendance at either Corner Canyon (Biology) or the University of Utah (Chemistry). Lab fees will be dependent on location.

(\$100-\$400 depending on location). College Credit will be available upon completion of chemistry lab. There is "strong evidence of benefits to students who participate in both AP courses and exams in terms of higher GPAs, credit hours earned and four-year graduation rates" (<http://www.washingtonpost.com/wp-dyn/content/article/2007/01/28/AR2007012801238.html>)

3 years of Science courses are required for graduation from Canyons School District. Admission to most Universities requires 3 years of lab science (Biology, Chemistry, and Physics). We strongly encourage every student to take 3 years of Science and Math, plus one year of elective science.

Electives

Astronomy
Medical Anatomy/Physiology (CTE or AAS-S)
Zoology
Wildlife Biology
Medical Terminology (concurrent WSU)
Exercise Science / Sports Medicine
Intro to Health Science (CTE)
